

Software Testing Academy

About the project

Training Software Testers of Tomorrow Through Social and Educational Equity.

Software Testing Academy project aims to develop personalized training courses in order to equip future software testers with the right set of hands-on and up-to-date skills to respond the market demands.

- 32-month collaborative project
- Combining both agile and systematic implementation methodology
- Transnational outreach of the project results
- Participating organisations from Portugal, Spain, Germany, and Poland.
- Co-funded by the Erasmus+ programme.

The consortium

- CEPROF - Centros Escolares De Ensino Profissional

- Amaris Consulting (Spain)

- Quality Minds (Germany)

- WSEI – University of Economics and Innovation in Lublin (Poland)

Objectives

Our objective is to create a personalized training model for future professionals working in Software Testing and set up learning tools to provide up-to-date software testing training courses.

To this end, the project will develop the following results:

- R1 Software Testing Educational Pathways for Newcomers
- R2 Training materials and resources
- R3 Online learning platform
- R4 Training courses
