

Software Testing Academy

About the project

We are pleased to announce the launch of our Software Testing Academy project. Over the past few months, we have conducted multiple questionnaires to gather feedback and insights from our community.

From this data, we have developed a comprehensive report outlining the current state of software testing in our field and identifying areas for improvement.

Based on this report, we are developing three main modules that will be implemented during the project. These modules will focus on providing hands-on training and practical skills development in key areas.

The consortium

- CEPROF - Centros Escolares De Ensino Profissional

- Amaris Consulting (Spain)

- Quality Minds (Germany)

- WSEI – University of Economics and Innovation in Lublin (Poland)

Benefits

We believe that this project will not only benefit individual testers but also organizations and the software testing industry as a whole. We are committed to providing the best possible training and resources to help our members excel in their careers.

We will keep you updated on the progress of the project and look forward to your continued support.
